

XL A20
Honeycomb pleated blind, Top-Down Bottom Up with chain drive

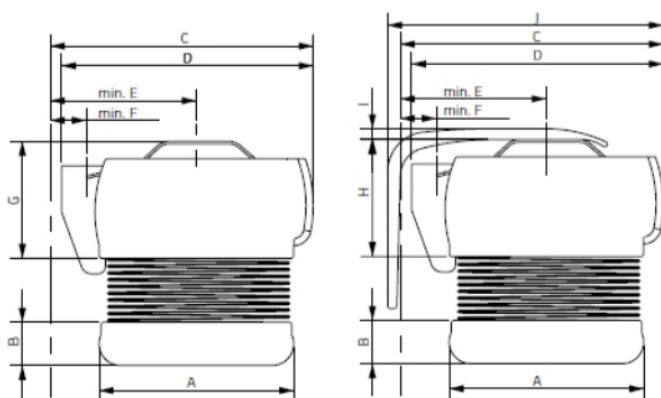

- Design: free-hanging system with cord operation and variable curtain
- Adjustable upper and lower profile
- Suitability: for vertical rectangular windows
- Installation: screwed into the recess, on the architrave, on the wall
- Operation: by plastic chain, metal chain or cord
- Profile colour: white, silver, anthracite or black

This honeycomb/pleated blind with **two operable rails** (unlike in the illustration below) hangs freely downwards. It is operated using an operating chain (plastic or metal) or cord. This allows you to move the pleated blind from above and/or below to the desired position, which is also held in place by the integrated cord brake. In addition to a large selection of fabrics, various profile colours (white, silver, anthracite, black) are available in metal or in colour-matched plastic chain. You can attach the screw-on pleated blind to the architrave, a recess, or a wall. Please also note the corresponding MOTIONBLIND PDF and measuring instructions.
