

## TECHNICAL DATA

### MODEL WVS3D - BRACED HONEYCOMB AND PLEATED BLIND SYSTEM 2022 WITH TWO FABRICS

Model WVS3D

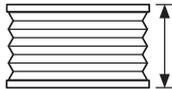

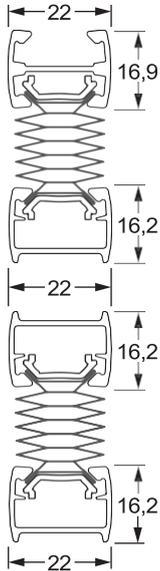

#### Product Description

Custom-made, braced pleated blind for vertical windows with two combined fabrics in one system. The WVS3D model variant consists of a fixed top rail, two sliding centre rails and an aluminium lower rail. Here, the two fabrics form a two-part package at the top and bottom. The upper rail is attached via clips and at the bottom via a one-piece tension shoe. Optionally, the lower rail can be locked on the tension shoe via magnetic latching. The profiles are available in white, anodised aluminium, anthracite and black.
