

Care information

The finish makes KADECO roller blinds insensitive to dust and dirt. If you do want to clean them, please observe the special instructions indicated by the cleaning symbols and the enclosed instructions.

Brushing

Soiling (e.g. dust) can generally be removed with a soft clothes brush or carefully vacuumed off.

Damp cloth

To moist-wipe the roller blind, place it on a smooth surface. Wipe the roller blind carefully on both sides with a soft cloth that has been moistened with mild detergent.

Cleaning bath (for panel tracks only)

Loosely roll up the lengths of fabric. Reach into the rolled up length of fabric from the side and move it around in warm mild detergent (max. 30°C) for no more than 10-15 minutes. After immersing the fabric, rinse it out with clean water, let it drip for a moment and then hang it back up while still wet. Once the bottom profile has been attached to the lengths of fabric, hang them up (with a towel underneath to catch the drips) and allow them to dry with the window open.

Important: Do not iron the fabrics!

Mechanical parts of electrical units must not come into contact with water!

If you are cleaning glass and window frames, never use abrasive or alkali detergents. We cannot accept any liability for fabric damage caused by condensation, detergents or insects soiling the fabric. Nor do we accept any liability for subsequent damage due to incorrect handling of our products.

Please see our product overview for recommendations on how to care for the various fabrics.
