

EASY FRAME/PERFECT FIT BLINDS

Thanks to its drill-free magnetic installation system, the blind can be fitted quickly and cleanly directly onto the window frame, making it ideal for uPVC and aluminium windows with a minimum glazing bead depth of 15mm. The aluminium frame fits neatly between the glazing beads, creating an almost flush finish while acting as a side guide to achieve near-complete blackout.

Installation is simple: magnetic strips are attached to the window frame with adhesive tape, allowing the blind frame to click securely into place. The frame can also be easily unclipped when needed, providing convenient access for window cleaning or maintenance.

The blind fabric is fully integrated into the aluminium frame and is operated manually by moving the top or bottom rail, allowing the blind to be positioned at any height. Fabrics are available in a range of colours and options, from light-filtering to blackout, to suit different privacy and light control needs.

There are four textured rail colours to choose from: white, cream white, anthracite and black, matching the visible components.

The blind is available in honeycomb fabrics from the LYSEL HOME collection in 20 mm and 25 mm cell sizes.

Fitness:

- Suitable for vertical, rectangular or tilt and turn windows and doors of any material with a minimum glazing bead depth of 13mm
- Specifically designed for indoor use

Assembly:

- Drill-free installation
- Attached to the window frame with magnetic tape
- Quick assembly thanks to modular frame design
- No fixed screws are needed in the glazing bead.
- Ideal for sensitive window frames or rented apartment

Design & Materials:

- Available in four colours: White, Cream White, Anthracite, Black
- Compatible with pleated and honeycomb fabrics in 20 mm and 25 mm cell widths, including sun protection fabrics.

Special features:

- Mechanics are almost invisible within the frame – looks elegant and high-quality
- Installation does not affect the function of the window handle.
- The frame provides almost complete blackout, making it a good option for bedrooms.

MIN. Width 328mm **MIN.** Height 228mm

MAX. Width 1480mm **MAX** Height 2250mm

Maximum area: 2.25m²

Operation Manual operation-cordless

Easy frame height	Package stack-height (Pleated)	Package stack-height (Honeycomb)
50 cm	6 cm	6 cm
100 cm	7.0 cm	7.5 cm
150 cm	8.0 cm	9.0 cm
200 cm	9.0 cm	10.5 cm
220 cm	9.5 cm	11.0 cm

Please note! There must be 2 cm of space between the window handle and the glass. For mounting, the magnetic strip must be able to be stuck to a flat surface.
