

KADECO®

VENETIAN BLINDS

MODELS AND OPTIONS
FROM 05/26

LIGHT IN BALANCE

KADECO Venetian blinds combine precision and elegance. They enhance the ambience and direct daylight individually according to your wishes.

Each Venetian blind makes an aesthetic statement – with slats made from natural wood, high-quality design felt or classic aluminium in a wide spectrum of colours and finishes.

Current trends and fascinating colour worlds come to life in the KADECO Atelier. For rooms with character.

SOFT SYMPHONY

When Neo Neutrals make a statement:
Warm neutral tones bring new depth to interiors.
Macchiato, Toffee and Terracotta replace cool shades.
Soft nuances blend tone-on-tone into calm colour
worlds. Timeless and inviting.

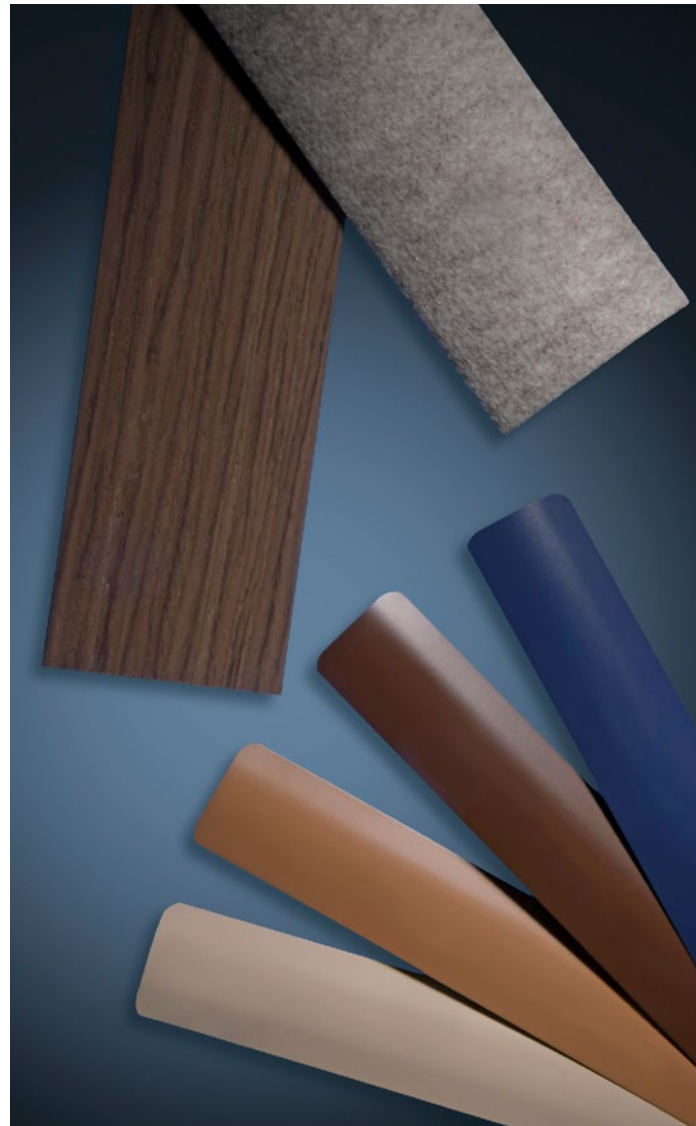

NORDIC CLARITY

A modern interpretation of the Scandinavian way of life: Nordic Greens combines cool grey, muted beige and earthy green tones to bring more calm and balance to rooms. For the perfect balance between minimalist serenity and warm cosiness.

POETRY OF WORLDS

The wideness of sky, sea and earth united:
The Blue Desert theme world plays with facets of
fascinating brown tones, nature-inspired camel and
deep blue. A homage to the contrasts of nature –
cool and warm, calming and vitalising, classic
and modern.

OUR SLAT TYPES

ALL-ROUNDER ALUMINIUM SLATS 16, 25, 50 mm

Robust, easy to care for and moisture-resistant - the high-quality aluminium slats of KADECO Venetian blinds convince with durability and longevity. This makes them an excellent choice for hygienically demanding areas as well as bathrooms and kitchens.

Thanks to the wide selection of finishes and colours, the slats can also be perfectly coordinated with any interior.

16 mm slats
create a particularly delicate look in front of small to medium-sized windows

25 mm slats
are very versatile with a wide range of options

50 mm slats
form a design element for larger windows (with ladder tapes as an option)

VENETIAN BLINDS IN DESIGN FELT

STYLISH.
COSY.
UNIQUE.

With the Oslo and Stockholm series, we bring the up-to-date design felt to the window. The interplay of a traditionally inspired felt surface and subtle colouring lends every room a warm, comfortable note - very much in the spirit of Scandinavian cosiness. Exclusively from KADECO.

The centrepiece of these Venetian blinds is the refined slat made from design felt. The robust felt fabric is produced from polyester fleece using special processing techniques in a multi-stage manufacturing process, then compressed and shaped.

The soft material with its high-quality haptics impresses with excellent fade resistance, easy cleaning by simple vacuuming, and improved room acoustics thanks to its sound-absorbing properties.

H40192

NATURAL. VIBRANT. FASCINATING.

The power of nature, its uniqueness and character, are expressed in few materials as intensely as in wood. It creates atmosphere and exudes natural charm. KADECO wooden Venetian blinds play with this effect - impressive and yet understated. Underlined by carefully selected wood species, refined with harmonious colour tones.

VENETIAN BLINDS IN WOOD

SUSTAINABILITY

Taking responsibility through sustainable action – the guiding principle
#weloveourplanet runs like a central theme through the KADECO collections
and stands for our commitment and mindful approach to nature.

we
love
our
planet

WOOD SLATS WITH FSC® CERTIFICATION

For the wooden Venetian blinds of the Nola and Kyoto series, we have consciously chosen slats made from FSC®-certified Abachi wood and bamboo in line with this commitment. These are marked in our collection in the corresponding wood fan. The label guarantees sustainable forestry and responsible use of resources to the highest, continuously monitored standards.

DESIGN OPTIONS

KADECO Venetian blinds offer numerous personalisation and design options.

Slat versions

- High-gloss
- Matt
- Textured
- Perforated
- Sparkle
- Wood effect
- Reverse side Thermostop

Slat material

- Aluminium
- Holz/Bambus
- Design-Filz

Slat width

- 16 mm
- 25 mm
- 50 mm

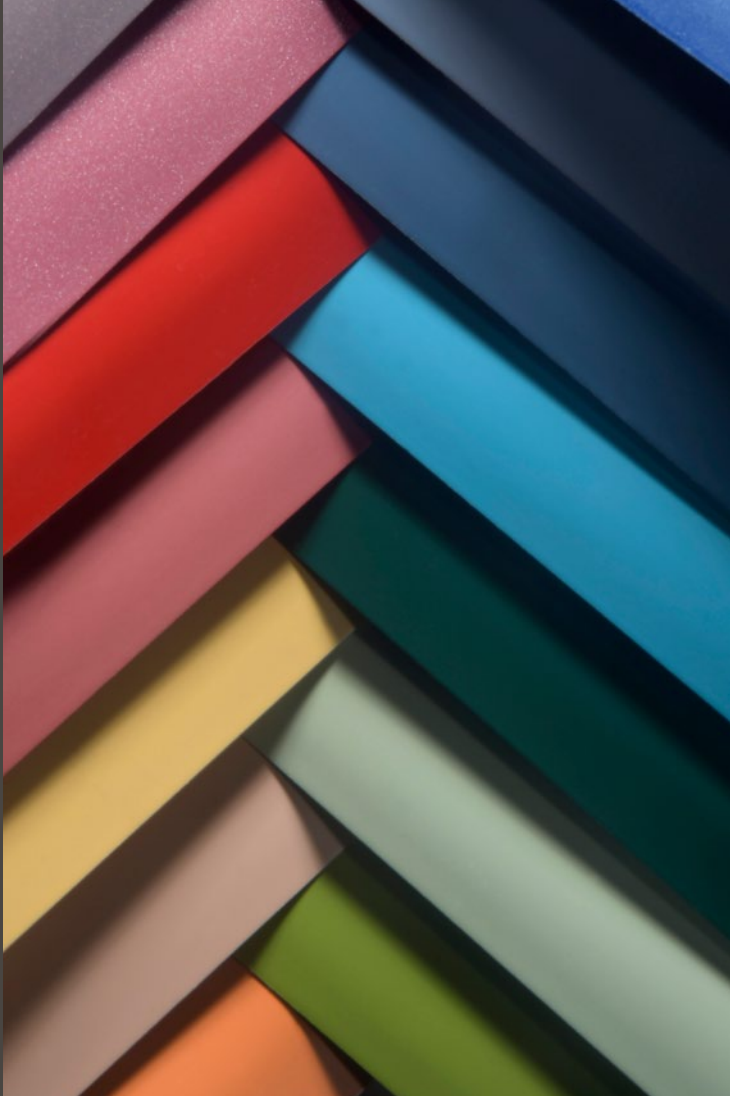

Customisation options

- Slat colour change
- Ladder tape colours
- Plastic component colours for operating chain and handle
- Panorama for a better view to the outside

COLOURS

The Venetian blinds score with a well-thought-out colour concept: all components are harmoniously coordinated with the slat colour. Matching cords and a wide selection of ladder tapes in various shades ensure a perfect look.

PROFILES

The top and bottom profiles are identical to the slat colour or colour-matched. The corresponding profile colours can be found in the sample fans. All aluminium profiles are high-quality anodised (E6/EV1) or powder-coated for lasting quality.

For blinds with 50 mm slat width, the following profile colours are available:

White

Silver

Black

PLASTIC COMPONENTS

Operating handles and operating chains are assigned to the different slat colours in four colours. The assignment can be found on the samples.

* For systems JOI1 and JOI2 in White and Grey only

Handle

Operating chain

LIVING STRIPES

INDIVIDUAL COLOUR DESIGN
FOR MODERN ROOMS

INDIVIDUAL DESIGN

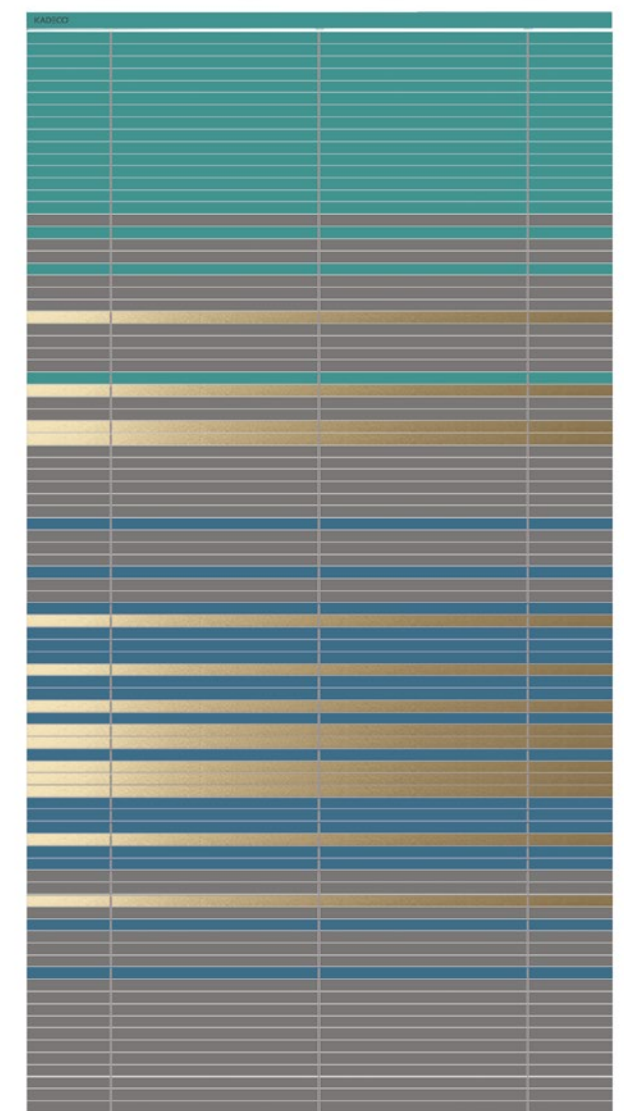

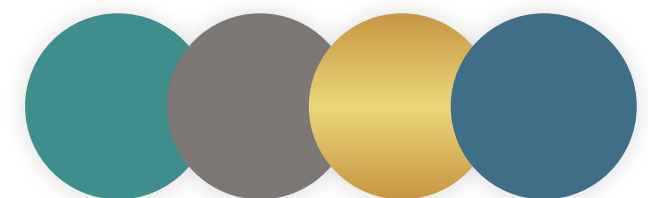

COLOUR DESIGN TO YOUR WISHES

The Living Stripes series enables individual colour combinations for each single slat. Whether harmonious colour gradients or contrasting accents – every design becomes a unique statement at the window.

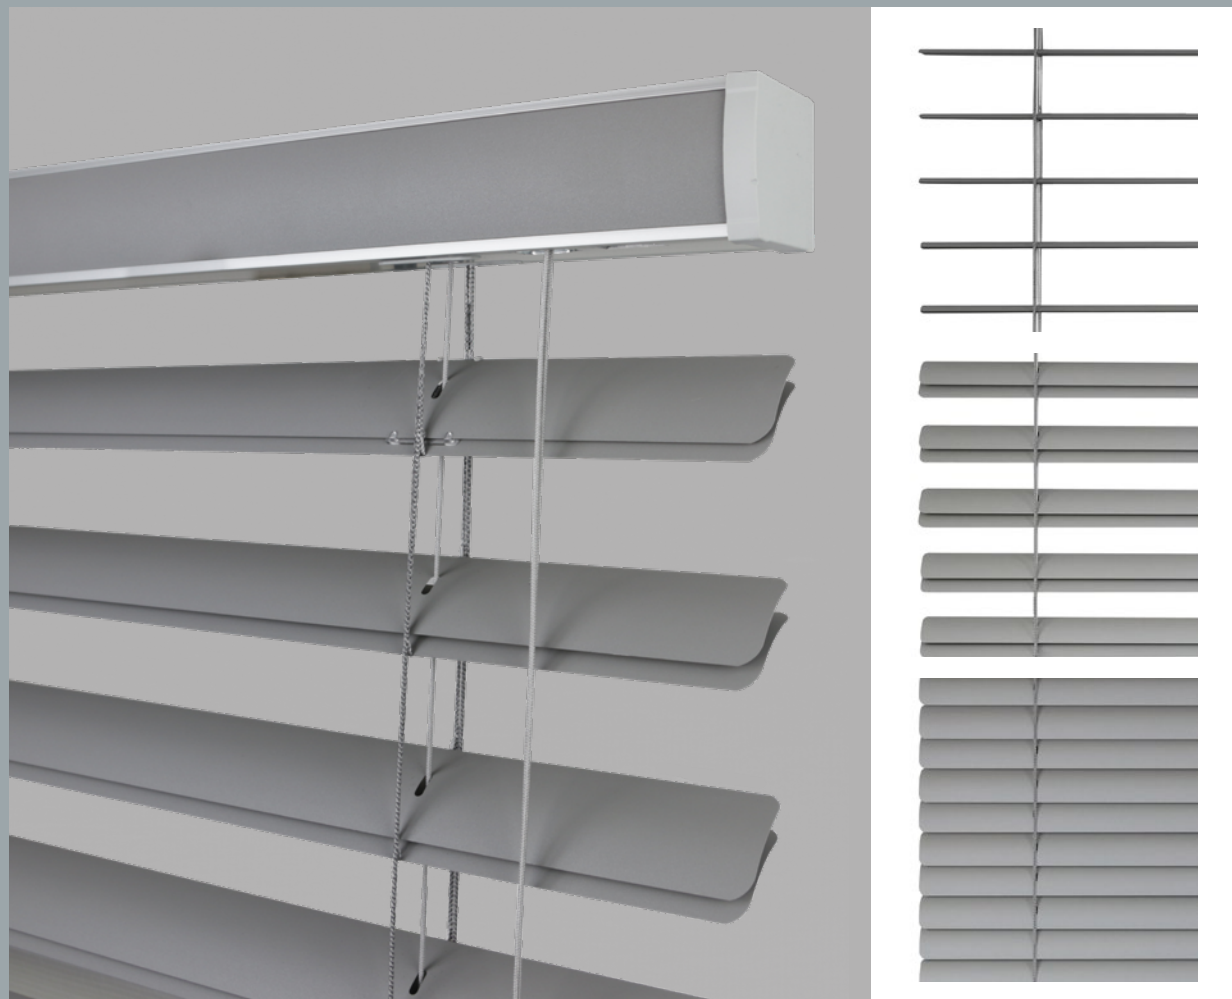

CREATE ONLINE

From colour selection to the finished Venetian blind – the online configurator offers unlimited design options and a practical preview of your desired blind. Slat by slat, a bespoke design is created on screen, perfectly tailored to every living space.

ELEGANCE AT THE WINDOW

Stylish details, a visible mechanism and high-quality wooden slats – the Revival Venetian blind impressively combines original charm with modern living. This combination makes it a functional highlight at the window.

ENJOY A BETTER VIEW

The sophisticated technology of the JS5 Panorama Venetian blind enables an improved view to the outside. When tilting, two slats are lifted simultaneously and the viewing gap is doubled. For a better view – with all the familiar advantages of a Venetian blind!

KADECO COLLECTIONS ONLINE

THE DIGITAL FABRIC CATALOGUE

We love fabrics and designs – because they are the visual centrepiece of KADECO sun protection products. With the KADECO Collection digital, selection is possible online.

Using various filter functions, materials can be filtered, for example, by designs and colours as well as properties. All important details of the selected slats are displayed clearly: The detailed preview images show the front and back as well as the close-up view of the selected material at a glance. There is also the option to download the data sheet and view the complete product properties in a clear summary.

Digital Fabric Catalogue

The QR code on the sample pages will take you directly to the digital KADECO collection, where you can view the fabric properties online.

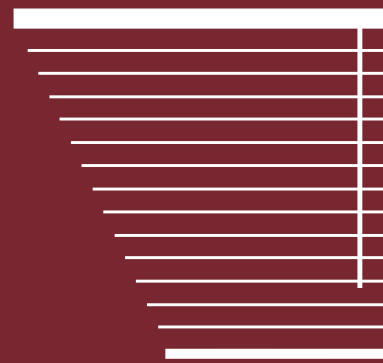

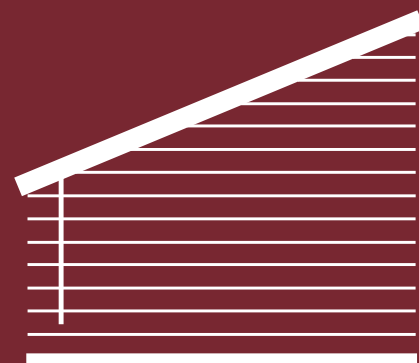

FOR LARGE SURFACES

Large glass fronts are an integral part of modern architecture and place high demands on privacy and sun protection. Free-hanging Venetian blinds are particularly suitable for high-positioned and large windows. They can also be motorised or fitted with individually long operating elements. For even greater comfort.

FLEXIBLE SOLUTIONS

FOR SPECIAL SHAPES

Solutions beyond the standard – as all KADECO products are manufactured individually and to measure, we also offer the perfect Venetian blind for special shapes.

MODELS JCS20, JCS21, JCS22

- Full-surface tilting via tilt rod
- Limited height adjustment via pulling cord
- Operating sides are possible as per the diagrams

PROPERTIES

The choice of slats for a Venetian blind can be decisive for the room climate and visual effect. Please pay attention to the following special features:

Damp room suitability

Optionally, for 16 mm and 25 mm wide aluminium Venetian blinds, special top and bottom rails in white and silver are available, enabling use in damp rooms. With these profiles, all aluminium slats can also be used in damp rooms.

Thermostop

Slats with a highly reflective reverse side reduce heat build-up caused by sunlight in the room.

CARE INFORMATION

Cleaning our Venetian blinds should be carried out with a feather duster or a damp cloth. Tip: A cotton glove also works very well. This allows you to remove dust from the individual slats of the Venetian blind simultaneously with four fingers.

Mechanical parts of electric and crank systems must not come into contact with water! Do not use harsh, alkaline detergents for cleaning glass and window frames. No warranty can be accepted for slat damage caused by condensation, cleaning agents or insect soiling. We cannot accept liability for any consequential damage caused by incorrect handling of our products.

SUITABILITY FOR USE IN WORK AREAS

Provide the best light for your employees

Daylight makes you feel happy, cheerful and productive. These positive attributes can also be brought into the workplace - without unpleasant side effects such as glare, heat radiation or reflections on computer screens. The design of modern workplaces actually has such a significant effect on the health and well-being of employees that information, guidelines and legal regulations have been created to ensure this is taken into consideration.

Since the amendment of the Workplace Ordinance (ArbStättV), the Display Screen Equipment Ordinance (BildscharbV) has been incorporated into the ArbStättV in Germany, which is legally binding. The ArbStättV covers the holistic design of workplaces and working conditions, taking into account the safety and health of employees.

What are considered good conditions for DSE workstations?

- Every window must be fitted with a suitable, individually adjustable privacy shield and glare protection device
- Annoying reflections and glare on screens must be prevented as much as possible
- Equipment should be adjustable so that users have a line of sight to the outside world, for most of the time at least
- It must be possible to react flexibly to changing daylight conditions
- The workplace must be sufficiently lit
- Screens must be at an approximately 90° angle in relation to the window in order to reduce reflections in general (note examples provided by the German Social Accident Insurance)
- Praktische Hinweise zur Umsetzung der EU-Richtlinie finden Sie unter:

Practical information about implementing the EU directive can be found at:

German Social Accident Insurance
DGUV Information 215-444
(sun protection in offices).

Meeting legal requirements with style - with KADECO

Daylight at display screen equipment workstations must be used in a targeted manner without causing disturbing glare. Flexible and effective solutions are therefore required.

The internal privacy and sun protection systems from KADECO enable precise regulation of light ingress and adapt at any time to individual requirements. This creates optimal glare protection at the workplace - implemented in a functional, comfortable and aesthetically pleasing way.

Current legal requirements, standards and directives:

- German Workplace Ordinance, ArbStättV, Appendix 6 (measures for the design of DSE workstations)
- Technical regulations for workplaces, ASR 3.4 (lighting)
- German Social Accident Insurance, DGUV Information 215-444
- Lighting of work places - Indoor work places, EN 12464-1
- Ergonomic requirements for office work with visual display terminals EN ISO 9241-6

Note

This information does not claim to be complete, and does not exclude any other equivalent technical solutions that are equally safe. In certain unfavourable situations, additional externally located glare protection may be necessary.
