

SPECIAL DESIGNS 25mm slates WITH CORD PULL AND ADJUSTMENT ROD

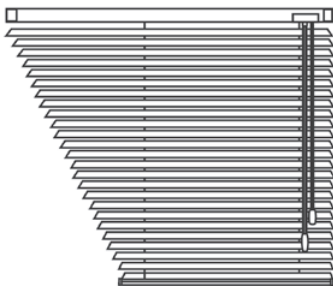

JCS20, JCS21, JCS22

Product description

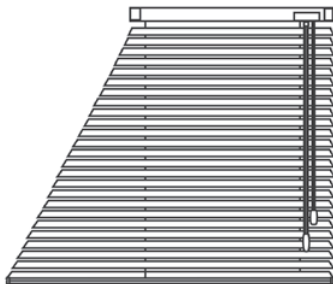

JCS20

JCS21

JCS22

For dimensioning details, see note about measurements for special designs

Price basis, width = basic width

Price basis, height = maximum height

The slats can be fully angled on all systems, but there are restrictions on how far the blinds can be raised.

Note

The sketches show an internal view of the Venetian blinds. Please always enclose a sketch with details of all width and height measurements. Specify all measurements without any deductions. If the product is going to be installed on the frame, specify the required excess width and length.

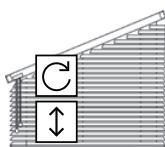

Other special designs on request.

SPECIAL DESIGNS

WITH CORD PULL AND ADJUSTMENT ROD

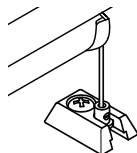

JCS20, JCS21, JCS22

Operation (included in the scope of supply)

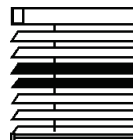

Cord pull/adjustment rod
The cord pull and adjustment rod are always located on the lowest side.

Options (option available at additional cost)

Anti-swing mechanism (JCS20 only)

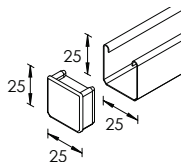

When the Venetian blind is installed on the casement, the bracing wire on both sides prevents it from swinging.

Colour change

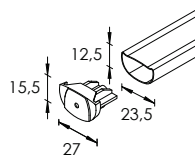

You can select different slat colours within the same Venetian blind.

Profiles (option available at additional cost)

Upper profile

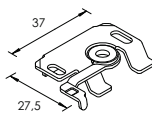

The upper and lower aluminium profiles that are suitable for use in damp rooms are made of corrosion-resistant aluminium. They are available in colours 10632 and 10076.

Lower profile

Installation accessories (included in the scope of supply)

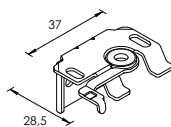

Please select:

Ceiling mount

for installation **in** the window rabbet, **on** the ceiling or **in** the window niche
50000 Zinc-plated

or

Wall mount

for installation **on** the frame, **on** the wall or **in front of** the window niche
50001 Zinc-plated

Included in the scope of supply of the anti-swing mechanism

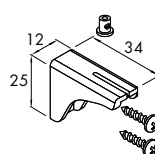

Please select:

Clamping block for anti-swing mechanism

incl. screw and locking ring
43450 Transparent

or

Wall angle bracket for anti-swing mechanism

incl. screw and locking ring
75180 Transparent

SPECIAL DESIGNS, 25 mm

Additional Features possible

Anti-swing mechanism/system
Per colour change within a Venetian blind
Prices for colour changes across multiple price brackets
are calculated based on the price bracket of the first slat/
the slat at the top.
Damp room suitability

Notes

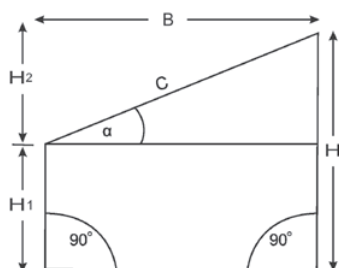

Venetian blinds less than 60 cm wide and/or less than 80 cm in length are charged at the same price as the minimum width (60 cm) and/or height (80 cm). Prices for oversized products are available on request. Venetian blinds featuring designs are supplied without any pattern repeat. Only covered by the warranty if used in dry rooms.
As KADECO Venetian blinds are made to order, they are non-returnable and non-exchangeable.
