

TECHNICAL DATA

MODELS VS3, VS3D - TENSIONED PLEATED SHADE SYSTEM 2022 WITH TWO FABRICS

Model VS3D

Product Description

Custom-made, tensioned pleated shade for vertical windows, featuring two coordinated fabrics in a single unit. The VS3D model variant features a fixed top rail, two sliding center rails, and an aluminum bottom rail. Here, the two fabrics form a two-part stack-top and bottom. The top rail mounts with clips, and the bottom is secured with a one-piece tension shoe. As an option, the bottom rail can be locked into the tension shoe via a magnetic latch. Profiles are available in White, anodized Aluminum, Anthracite, and Black.
